

CLAIMS

1. In a toilet having a rim and a bowl, a stool sample collection device comprising:

a sample collection platform arranged to receive a stool sample from a user;

5 and

an end wall extending from the sample collection platform at an angle to the sample collection platform, said end wall including attachment means for attaching the device to the bowl of the toilet.

2. The device according to claim 1 wherein the sample collection
10 platform has a substantially concave shape.

3. The device according to claim 1 wherein the attachment means comprises suction cups.

4. The device according to claim 3 wherein the device includes two suction cups spaced laterally apart on the end wall.

15 5. The device according to claim 1 wherein the platform includes a plurality of apertures.

6. The device according to claim 1 including at least one slot on the platform proximal to the end wall and at least one ring inserted through said slot.

7. In a toilet having a rim and a bowl, a urine and/or stool sample
20 collection device comprising:

a receptacle having a cup arranged to receive urine;

a sample collection platform arranged to receive a stool sample from a user, said platform including an opening for inserting the cup therein; and

an end wall extending from the sample collection platform at a right angle to
25 the sample collection platform, said end wall including attachment means for

attaching the device to the bowl of the toilet.

8. The device according to claim 7 wherein the sample collection platform has a substantially concave shape.

9. The device according to claim 7 wherein the attachment means
5 comprises suction cups.

10. The device according to claim 9 wherein the device includes two suction cups spaced laterally apart on the end wall.

11. The device according to claim 7 wherein the cup includes a spout extending upwardly from the cup at an acute angle
